The property owner / occupier where a trap is placed agrees to the following cat trap setting conditions:

1. Traps are to be supervised at least once per hour when set. If a trap is set overnight it must be visually inspected first thing in the morning before 9 am. If a cat is in the trap, the person in care of the trap must call the on-call animal control officer forthwith and inform them of the trapped cat.
2. Traps are not to be set when the weather temperatures are going to be higher than +24°C or lower than +3°C.
3. Traps are to be set in such a way as to provide the trapped cat with shade from direct sunlight and with shelter from rain or inclement weather.
4. Traps are not to be set if the timely pick up and transport of the cat cannot be facilitated. Example: Friday or Saturday night or evenings before a statutory holiday.
5. When someone agrees to take possession of a trap for the purpose of trapping, they must arrange ahead of time the timely intake of any trapped cat with the shelter and the animal control officer.
6. If a cat is trapped late in the evening and cannot be transported until the next morning, the person in care of the trap agrees to move the cat in the trap to an indoor space that is of an appropriate temperature until the morning when transport to the shelter can occur.
7. No one in the care of a trap can tease or torment any cat within a trap, nor can anyone else bother or harass the cat.
8. If for any reason a cat ends up in a trap and it cannot be taken to the shelter within a 12-hour period, the person in care of the trap must release the cat unharmed to be trapped at a future date.
